

1870 Oct 10
BAS

My Dear Sir.

My bowels seems better - the circulation has gone higher up but I've been feverish a little - headache, pains in hip joints, dry burning feet - general soreness of the muscles particularly those of hips & lower back - am perspiring but find no relief - the seminestraes are somewhat obstructed - indicating a general cold - nothing more I think - as I may have a restless night often may not a dover's powder better suit the change I have undergone than the morphine you ordered this morning may not the latter increase the headache and perhaps there which I did not have this morning - Should you judge the dover's

~~care for my case now~~
please give the formula for it to
the bearer.

Please excuse my troubling you
thus - I want to hasten my thought,
if any I have, by a quiet night's sleep -
I hope you will see no presumption
on my part on account of suggestions
herein made. Only in view of the
change since morning -

Sincerely hoping that you are
well, permission to subscribe my
self, Your friend "et cher malade".
J. B. Soulard.
